Bond Commission Approves Danbury Health Care Center Renovations

The state Bond Commission approved \$3.5 million to renovate health care centers in New London, Bristol and Danbury.

The state Bond Commission approved \$1.5 million Friday to renovate and expand the Community Health Center package to help centers in Danbury, Bristol and New London.

“We appreciate Governor Malloy’s commitment to creating construction jobs and making an investment in private construction,” said Mark Masselli, president and CEO of Community Health Center, Inc.

In Danbury, the Community Health Center at 8 Delay St. will be renovated to meet the community’s demand for dental services. Since opening in 2008, the Community Health Center of Danbury has grown to serve more than 100,000 square feet it occupies. The 7,000-square-foot expansion will double the center’s capacity.

“This expansion will allow CHC of Danbury to continue accepting new medical patients and begin offering dental services at the director of CHC’s Fairfield County sites. “The need for dental care in the Danbury area is extreme. A 2010 survey showed that 60 percent had not seen a dentist in the past year. We thank Representative Bob Godfrey for understanding the need for dental services to the community and for advocating for this project.”
