

We Know  
**Specialty Care**  
Perinatology, Cardiology, Podiatry  
Your Family's Health Partner

At QueensCare Family Clinics we offer a well-rounded array of medical services, but it's our specialty care that set us apart from others. Each one of our specialty services plays a role in enhancing and strengthening the medical care we offer you and your family.

### Perinatology:

#### *Special Care for You and Your Baby*

Did you experience complications during your last pregnancy? Women who face chronic diseases such as diabetes, heart disease, hypertension or other conditions during pregnancy are considered high-risk, and may need the specialized care of a perinatologist.

### Cardiology:

#### *Specialists Who Care for Your Heart*

We have a highly-qualified staff of cardiologists to treat problems of the heart, arteries and veins. Our specialists provide the highest standards of care, treating heart and heart-related diseases such as atherosclerosis, coronary artery disease and more.

### Podiatry:

#### *Specialists Who Keep You Moving*

Our podiatrists are trained to treat a variety of foot ailments and to watch for the effects of diabetes on feet. If you have diabetes, it's very important that you have your feet checked regularly.

### Education and Reassurance for You

Education is a part of your care. Our specialists take the time to answer your questions. They inform you of your options, calm your fears and keep you informed of what's coming next. If you need specialty care that is not available from our medical team, we can refer you to an expert in the field.

To find out more, call your neighborhood QueensCare Family Clinic, or call us at (800) 454-1800.
